There were various mechanisms to encourage marriage and childbearing.observational trial with leios alesse

At a time when effective means of contraception for the majority of the population were not available, the general practice of abortion has become a vibrant cultural and reproductive characteristics essential factor in determining the overall trends in fertility.observational trial with leios alesse

The result has been a sharp decline in the birth rate.observational trial with leios alesse

India, women marry at a very young age, thus increasing the birth rate, but the limiting factor is there exists a strong prejudice against the remarriage of widows.observational trial with leios alesse

Portugal, an important obstacle to increasing the birth rate remains celibacy and delayed marriage.observational trial with leios alesse

Major changes in the structure used contraception in the period between the two surveys - a reduction in the proportion of traditional methods and increase the share of the contraceptive pill.observational trial with leios alesse

Cultural and other influences.observational trial with leios alesse

Overall, however, the primitive and ancient communities relied more on abortion and infanticide than for contraception.observational trial with leios alesse
